

For best results: Measurements should be taken wearing undergarments only.

Chest / Bust:

Raise your arms slightly and measure around your body. Keep the tape firmly under your arms and around your shoulder blades. Measure over the fullest part of your chest/bust while keeping the tape parallel to the ground. Remember to keep the measuring tape comfortable but not loose.

Waist:

Measure around your waist, or where you normally wear your pants. Place your index finger between your body and the tape to allow accurate fit. For a baggy fit add 2 - 4 inches to waist size.

Inseam (length of inside leg on bottoms):

Take a pair of pants that have the right length and lay them flat. Measure the distance between the crotch seam and bottom edge of inside leg.

Sizing Tips:

- Choose your size based on the charts provided.
- Your measurements should fall into the range listed in the size charts.
If you want a roomier fit - pick the next larger size.
- The fit and chest measurements vary by style. Actual garment measurements are included in the item's product description.
